AC45-127S

STANDARD FEATURES

• Altec LMAP (Load Moment & Area Protection) System
  » Rated Capacity Limiter
  » Displays: Boom Length, Boom Angle, Load on Hook, Percent of Rated Capacity
  » Operator Defined Audible Alarm Set-Points for Boom Angle, Length and Rotational Position
• Dual Entry 20° Tilt Cab with Heater and A/C
• Outrigger Boom Interlock System
• Outrigger Motion Alarm
• Winch Drum Rotation Indicator
• Anti-Two Block Device
• Winch Control at Load Hook Stow Point
• Hydraulic Oil Cooling System
• 15,000 lb 2-Speed High-Performance Piston Winch
• Rotation Resistant Wire Rope

OPTIONS

• ANSI A92.2 Compliant Aerial Operation Package
  » 2-Man, Steel Platform
    Fixed, 800 lb (362.8 kg) Capacity, or Rotating, 1,200 lb (544.3 kg) Capacity
  » Radio Remote Controls
  » Fall Protection
• Platform Hydraulic Tools & Intensifier Package
• 1-Piece 31 ft (9.4 m) Jib
• 2-Piece 55 ft (16.7 m) Offsettable Jib, 31 ft (9.4 m) Retracted
  » 0, 15, and 30 degree offset positions
  » Integrated Jib-tip Wheel for Offsetting Jib
  » Quick Pinning Offset Installation System
• Glide Swing
• 15,000 lb 2-Speed Auxiliary Hoist
• Hydraulic Tool Circuit at Tail Shelf

Recommended equipment, available through Altec Supply, include wheel chocks and outrigger pads.

Control System: Pilot-Operated, Hydraulic

ASME B30.5 Compliant

LOAD MOMENT AND AREA PROTECTION

The convenient LMAP menu navigation with an intuitive user interface displays load on hook, rated capacity percentage, boom length and angle, load radius, and operator-defined protection with audible alarms. While the intuitive display and user interface are unique to Altec, the system’s hardware consists of common “off-the-shelf” components that were critically selected for their performance and serviceability.

LOAD CHART - FULL SPAN OUTRIGGERS

FRONT WINCH CONTROL
The lower winch control reduces slip/trip/fall hazards because the load hook can be disconnected without climbing to the crane controls.

DUAL ENTRY CAB
Altec's patented dual entry cab provides safe access/egress throughout the entire range of rotation. The 20 degree tilt feature maximizes the viewing spectrum on the job site.

LMI REEL
The load moment indicator (LMI) reel is mounted at boom heel and protected by a metal cover while the A2B cable is routed through the boom, providing better reliability.

Note 1: When jib is erected, boom must be fully retracted before lowering below minimum boom with jib angles. Retracted boom with jib has no lifting capacity below a 50 degree angle with full span outriggers and below a 65 degree angle not shown on jib load rating chart.

Note 2: Do not lower boom into this area, instability may occur. Hydraulic pressure may not allow raising the boom without retracting boom first.

Charts published herein are intended to be a guide only and should not be construed to warrant application for lifting purposes. Consult supplied operation manual for further details.
