THE POWER OF ALTEC. THE VALUE OF ONE.

When you buy or lease from Altec, you get the convenience and consistency of having a single company handle all of your equipment needs. Dealing exclusively with Altec throughout the entire life cycle of your vehicle means you’ll enjoy better service, better reliability and better efficiency. From financing, training and maintenance to buy-back and re-purchase, one company handles it all. There’s a power in that simplicity and a value in what it represents.

YOU ARE INVESTING IN A RELATIONSHIP.

When you purchase from Altec, you invest in a relationship that spans the life of the equipment. Altec Service Group backs up this promise with the most complete and comprehensive service and support organization in the industry. We have service center locations throughout the United States and Canada, equipped with the technicians, tools, and equipment needed to get your truck up and running. Our extensive fleet of mobile service vehicles and technicians covers the entire United States.

We also offer the most complete line of parts for equipment repair and maintenance, along with a technical support and training organization.

ALTEC SERVICE GROUP CAPABILITIES AND ADVANTAGES.

- Skilled FPS-certified mobile service technicians
- Strong financial stability, liability protection
- Manufacturer-made repairs
- 24 Hr emergency support via on-call technicians
- Service Centers located throughout the United States and Canada
- Expert hydraulic, electrical and mechanical repairs
- Mobile service technicians available to be dispatched to your location
- AWS Certified welders to perform all structural welds
- Toll free number for service, parts and supplies - 1-877-Go Altec

In addition to our brick and mortar locations, we have hundreds of on-call mobile service technicians. See our website for the most up-to-date list of service locations.
Purchasing from Altec means you are working directly with the factory in all aspects of the product, including: fleet operations and management, sales, engineering, installation, service, parts, warranty, repairs and equipment disposal. We pride ourselves on building custom equipment for you and during this process we focus not only on understanding your needs but exceeding them. It’s in our DNA and that is why we are driven to design and engineer solutions that optimize the relationship between you, your equipment and the duties you perform together.

**WHY AN ALTEC BODY?**
Because of Altec’s structure and overall footprint in the industry, we have the capacity to manufacture a breadth of products, ranging from simple stock bodies to completely custom bodies. Altec recognizes that each customer’s need is different, so we offer various pre-designed packages to satisfy specific job site needs. Altec can also design and build a truck to your exact specifications so you’re receiving a purpose-built truck. Whatever your requirements may be for a body, Altec offers innovative solutions to assist you on the job.

**PURPOSE BUILT**
At Altec, you can work directly with our engineers to design a product unique to your work application. Using 3D software allows us to provide you with a visual to ensure the truck is designed correctly and features are integrated into the body before material is even cut. Altec offers the total value of single source manufacturing and installation with complete engineering integration of the body, chassis and mounted equipment. From concept to delivery, customers can work directly with Altec in all aspects of building a body.

**FOCUS FACTORY BUILT**
Altec Bodies are manufactured at focus factories that specialize in specific body designs and materials to ensure top-quality builds. Production begins with high definition cutting of plate from our precision lasers and plasma cutters to provide maximum design flexibility and accuracy while maintaining high volume production. Computer aided press breaks provide the ability for precise bends on variable components, which are then formed and welded to create finished parts ready for our corrosion-resistant paint. At our fiberglass focus factory, multiple mold sizes and flexible mold techniques allow unique dimensions and configurations of fiberglass body construction.

**QUALITY**
With a 12-stage electroating paint process for steel bodies, gel-coat process for fiberglass bodies, and chemical wash for aluminum bodies, Altec’s formulated paint processes increase durability over the lifespan of the body. As a standard, Altec paints the body interior and undercoats all bodies to prevent corrosion from weather and road contaminants. In addition, all Altec bodies come standard with stainless steel latches that are 100% corrosion-free. Each Altec Body undergoes stringent testing to ensure industry and factory standards are met. As a final measure, all Altec Bodies undergo a water test controlled by Program Logic Control to ensure bodies are leak-free.
BODY ONLY PRODUCTS
Altec's Body product line includes strategically designed units for various work applications. As with all Altec products, the bodies included in this portfolio can be purchased as designed or engineered to meet specific job site needs. For a full listing of all Altec Bodies, visit us online or give us a call to discuss your requirements.

OPEN TOP SERVICE BODIES
- Multiple applications
- Installed on light, medium or heavy duty chassis
- Pre-designed packages available
- Common accessories include liftgates, ladder racks, invertors, winches, etc.

SERVICE CRANE BODIES
- Multiple applications
- Installed on light or medium duty chassis
- Pre-designed packages available
- Crane capacities available for 12,000-30,000 ft-lbs
- Common accessories include generators, compressors, welders, etc.

GENERAL CANOPY SERVICE BODIES
- Commonly used in the gas construction, substation and cable splicing industries
- Installed on light or medium duty chassis
- Often used in conjunction with a need for an enclosed work-space and under deck compressor
- Common accessories include ladder racks, pipe trays, etc.

LARGE ENCLOSED SERVICE BODIES
- Commonly used in gas pipeline, water distribution or transmission line construction
- Installed on medium or heavy duty chassis
- Electrocoated paint process regardless of enclosure height
- Common accessories include under deck compressor, front winch, liftgates, etc.

CUT-AWAY VAN BODIES
- Commonly used in the gas construction, substation and cable splicing industries
- Installed on cut-away vans - Ford E350 and E450
- Access body from cab of chassis and rear of body
- Work bench and shelving configurations available
- Common accessories include ladder racks, pipe trays, etc.

TOPPERS AND CAPSULES
- Multiple applications
- Installed on light duty trucks
- Available in fiberglass or aluminum
- Customizable configurations
- Common accessories include inverters, bed slide outs, heaters, etc.
## BODIES

### ALUMINUM BODIES
Altec’s Aluminum Bodies are corrosion-resistant and improve payload, while increasing lifespan and resale value.

### STEEL BODIES
Altec has been manufacturing steel bodies since 1929, so we know how to build a heavy-duty, built-to-last truck body that works for you. That’s our standard, and it has made us the leading producer of utility line bodies.

### FIBERGLASS BODIES
Integrated composite core material makes Altec’s fiberglass bodies the lightest and strongest in the marketplace. Industry-leading support, warranty and manufacturing processes result in a product you can trust.

1.800.958.2555 | SALES@ALTEC.COM
Dear Customer,

Since 1929, Altec has been a company committed to excellence. Our products are industry leading and we consistently raise the bar through innovative product design, integrated safety features and quality manufacturing.

At Altec, we appreciate your business and will work hard to earn it! Altec offers the total value of industry-leading products paired with a complete range of services. From bucket trucks to boom truck cranes, to supplies and service, Altec can provide a solution for all of your job needs.

We believe in 100% customer satisfaction. With that in mind, our sales team strives to provide solutions tailored to your specific work needs – a custom built unit, or a tried-and-true piece of equipment, our sales team will work with you to find the right product for your business.

If you would like to learn more about how Altec can help you, give us a call at 1 (800)-958-2555. You can also connect with us on social or sign up for our newsletter on Altec.com

We hope to hear from you soon.

Thanks,
Altec Sales Team

Lee Styslinger III
Chairman and CEO

“Throughout our long history, Altec has remained committed to a firm set of beliefs and principles. For more than 85 years, these core values guide the manner in which we conduct our business on a daily basis, and help to provide the cornerstone of our corporate culture.”
